Dementia has a far-reaching impact on patients, families and our society as a whole. Our Memory Consultation Program is designed to assist primary care providers with diagnosis and management of dementia and dementia-related issues.

Program Goal
To provide coordinated consultation and evaluation of memory loss with enhanced communication with patients, families and primary care providers.

Why the Center for Health Aging?
- We specialize in team-based comprehensive care of older adults.
- Contact us if you want someone to spend additional time with your patients working through complex issues.
- We focus on optimizing the health, function and quality of life of older adults with dementia.
Components of the Program

- Memory Loss Evaluation is part of the 4 M’s of the age-friendly health system initiative.
  - What Matters
  - Medications
  - Mentation
  - Mobility

- Initial evaluation will include cognitive testing, and relevant lab work and neuroimaging.
- Referrals to neuropsychological testing, neurology and geriatric psychiatry, as needed.
- Education to your office and staff about dementia either via email or through in person in-servicing.

How to Contact Us

- For Health Care Providers, place an EPIC order to Jefferson Geriatrics and select “memory loss/dementia.”
- For Patients, call the Center for Healthy Aging at 215-955-6664 or visit JeffersonHealth.org/AgeHealthy
